

# Saad Hazim

Cybersecurity & Director of IT | (619) 536-6782 | [saadnamik@gmail.com](mailto:saadnamik@gmail.com) | [LinkedIn](#)

---

## SUMMARY OF QUALIFICATIONS

---

Experienced cybersecurity professional with expertise in Governance, Risk, and Compliance (GRC) and a proven track record in implementing security controls, mitigating risk, and driving compliance in enterprise environments. Known for strong communication and stakeholder management skills, with a commitment to ongoing professional development. Active member of InfraGard and ISACA, contributing to the broader cybersecurity community.

## AREAS OF EXPERTISE

---

Cybersecurity Risk Assessment & Governance.  
Identity & Access Management (IAM).  
Security Education and Awareness.  
Project Management & Multitasking.

Security Compliance & Regulatory Standards (NIST, CIS).  
Incident Response & Threat Detection.  
Strong Communication & Stakeholder Engagement.

## EDUCATION

---

**Bachelor of Science in Electronics and Electrical Engineering**  
Technology University.

## CERTIFICATIONS

---

### Cybersecurity & Governance Certifications

- CISSP – Certified Information Systems Security Professional
- CISM – Certified Information Security Manager
- CISA – Certified Information Systems Auditor
- AAISM – Advanced AI Security Management (In Progress)
- A/CCRF – Cyber Resilience Fundamentals (NIST CSF)

### Cloud & Platform Certifications

- AZ-900 – Microsoft Certified: Azure Fundamentals
- SC-900 – Microsoft Certified: Security, Compliance, and Identity Fundamentals
- CLF-C02 – AWS Certified Cloud Practitioner (In Progress)

### Infrastructure & Networking Certifications

- VCP 6.5 – VMware Certified Professional: Data Center Virtualization
- CCNA – Cisco Certified Network Associate

## SECURITY TRAINING

---

- **Simply Cyber Academy** – GRC Analyst Master Class Certificate of Completion.
- **GRC Mastery** – Cyber Security (GRC) Mastery Certificate of Completion.

## PROFESSIONAL EXPERIENCE

---

**Barona Band of Mission Indians (2015 – Present)**

**IT & Cybersecurity Director – Operations Manager (2020 – Present)**

- Led a cross-functional project to deploy a new security solution, collaborating with business owners and IT teams to ensure the implementation met both technical requirements and compliance obligations.
- Led enterprise-wide **NIST Cybersecurity Assessment**, identifying security gaps and implementing strategies to improve cybersecurity posture, which resulted in a **30% reduction in vulnerabilities** and enhanced compliance across the organization.
- Deployed **multi-factor authentication (MFA)** with **Cisco Duo** and improved email security through **Trellix** and **Barracuda**, achieving a **40% reduction in unauthorized access incidents**, safeguarding critical business assets.

- Developed and enforced security policies ensuring the **confidentiality, integrity, and availability (CIA)** of IT systems, driving a **30% increase in compliance adherence** and reducing regulatory risks.
- Integrated **CrowdStrike EDR**, **Cisco Umbrella**, and **BitLocker** for proactive threat detection and data protection, improving security posture by **50%** and minimizing data breach risks.
- Automated device management through **SCCM** and **Ninja One**, which improved **patching efficiency by 50%**, enhancing system security and reducing manual efforts.

#### ***System / Network Administrator (2017 – 2020)***

- Engineered and implemented secure network architectures based on secure-by-design and zero-trust principles, deploying technical controls that directly mapped to organizational security policy requirements and mitigated identified risks.
- Managed IT infrastructure for 250+ users, including VMware, Active Directory, and Google G-Suite, aligned with NIST-based security practices.
- Administered Palo Alto and Cisco ASA firewalls, VPNs, and IDS/IPS (Snort, FireEye) to enhance perimeter security and threat detection.
- Utilized SolarWinds, PRTG, and Qualys to monitor systems, improve visibility, and apply proactive risk mitigation strategies.

#### ***System Engineer / PC Technician (2015 – 2017)***

- Supported Collaborated with the Server Team to deploy security and functionality patches, which led to not only improved system stability but also reduced security risks.
- Administered imaging tools (WDS, PDQ, Ghost) and managed workstation rebuilds, improving deployment consistency and reducing provisioning time.
- Supported Microsoft systems (Windows 7/10, Server 2012–2016, AD), contributing to secure, well-managed environments.
- Performed secure data wiping and hard disk destruction, supporting compliance with data protection policies.
- Diagnosed and resolved hardware/software issues, which led to not only reduced downtime but also improved end-user experience.

### **SELECTED CYBERSECURITY ACHIEVEMENTS**

---

- **Security Awareness Program Implementation:** Launched a KnowBe4-driven training initiative, achieving a 50% reduction in phishing attacks and increasing employee engagement by 40%.
- **Network Infrastructure Overhaul:** Rebuilt IT infrastructure, installed Cisco/ Palo-Alto NG Firewalls, switches, reducing downtime by 60%.
- **NIST CSF Alignment:** Conducted a comprehensive cybersecurity assessment, improving organizational compliance and reducing vulnerabilities by 35%.
- **MDR Services Rollout:** Integrated Arctic Wolf's MDR services for 24/7 monitoring, cutting incident detection and response times by 30%.
- **Vulnerability Management:** Conducted targeted vulnerability assessments and penetration tests to identify control weaknesses, evaluated results using industry standards (CVSS), and delivered prioritized remediation recommendations. These actions supported the risk management lifecycle, informed policy exceptions, and achieved a 40% reduction in security gaps within one year.
